

## **Product certification and LPCB**

All FireAngel smoke alarm products are tested to EN14604 and carry the LPCB logo, a recognised symbol of manufacturing and performance excellence for smoke alarms.

The Loss Prevention Certification Board (LPCB) is one of the leading international certification bodies in the fields of security and fire protection.

The LPCB approval process involves assessment and testing of products to ensure that they meet quality standards set by a team of experts who may be regulators, insurers, designers, manufacturers, installers, engineers and scientists.

Approval of products is usually based on testing undertaken by world-renowned testing laboratories. This approval is maintained by regular audits to ensure that the product continues to meet the approval criteria.
